

# TABLE OF CONTENTS

<b>1</b>	<b>INTRODUCTION</b>	<b>1</b>
1.1	Motivation and Problem Description . . . . .	1
1.2	Research Question and Contribution . . . . .	5
1.3	Research Methodology . . . . .	7
1.4	Structure of the Work . . . . .	11
<b>2</b>	<b>PROBLEM FORMULATION</b>	<b>15</b>
2.1	The Automotive Supply Chain . . . . .	15
2.1.1	Overview . . . . .	15
2.1.2	Forming and stamping . . . . .	17
2.1.3	Body shop . . . . .	18
2.1.4	Painting . . . . .	20
2.1.5	Assembly . . . . .	21
2.1.6	Inbound . . . . .	25
2.1.7	Outbound . . . . .	32
2.2	The Forecasting Object . . . . .	34
2.2.1	Overview . . . . .	34
2.2.2	Dimension time . . . . .	34
2.2.3	Dimension product . . . . .	35
2.2.4	Dimension geography and customer . . . . .	37
2.3	Supply Chain Planning Processes . . . . .	39
2.3.1	Overview . . . . .	39
2.3.2	Long-term Planning . . . . .	40
2.3.3	Mid-term Planning . . . . .	44
2.3.4	Short-term Planning . . . . .	49
2.3.5	Data flow and entity relationship model . . . . .	53
<b>3</b>	<b>STATE OF THE ART</b>	<b>57</b>
3.1	Regression with ARIMA errors . . . . .	57
3.1.1	Literature review . . . . .	57
3.1.2	Model description . . . . .	58
3.1.3	Implementation . . . . .	60
3.2	Artificial Neural Networks . . . . .	61
3.2.1	Literature review . . . . .	61
3.2.2	Model description . . . . .	63
3.2.3	Implementation . . . . .	66

3.3	Random Forests Regression . . . . .	67
3.3.1	Literature review . . . . .	67
3.3.2	Model description . . . . .	67
3.3.3	Implementation . . . . .	68
3.4	Markov Networks . . . . .	69
3.4.1	Literature review . . . . .	69
3.4.2	Model description . . . . .	70
3.4.3	Implementation . . . . .	75
3.5	Hierarchical Models . . . . .	76
3.5.1	Literature review . . . . .	76
3.5.2	Model Description . . . . .	77
3.5.3	Implementation . . . . .	80
3.6	Forecasting in Automotive Supply Chains . . . . .	81
3.6.1	Forecasting in specific Domains . . . . .	81
3.6.2	Comprehensive Forecasts of total Sales, Options and Parts . . . . .	90
3.6.3	Forecasting of Options using Probabilistic Graphical Models . . . . .	92
3.7	Research Gap . . . . .	96
<b>4</b>	<b>DATA SOURCES AND PRELIMINARY EXPLORATORY ANALYSIS</b>	<b>99</b>
4.1	Description of available Data Sources: Which Data is available? . . . . .	99
4.1.1	Historical Orders . . . . .	99
4.1.2	Historical Configurations . . . . .	99
4.2	Data Exploration and descriptive Statistics . . . . .	100
4.2.1	Basic descriptive statistics . . . . .	101
4.2.2	Outliers and high leverage points . . . . .	101
4.2.3	Time series decomposition . . . . .	108
4.2.4	Autocorrelation (ACF) and Partial Autocorrelation (PACF) . . . . .	109
4.2.5	Unit root test . . . . .	110
4.3	Comparing and Clustering . . . . .	112
4.3.1	Conditional frequencies . . . . .	112
4.3.2	Time-series clustering . . . . .	117
<b>5</b>	<b>TIME SERIES MANIPULATION USING SUPERVISED LEARNING</b>	<b>123</b>
5.1	Motivation . . . . .	123
5.2	Shifting, Splitting, Training, Predicting and Testing . . . . .	124
5.3	Regression using Feed-Forward Artificial Neural Networks . . . . .	129
5.4	Regression using Random Forests . . . . .	144
5.5	Results of Regression Models . . . . .	152
5.6	Overcoming the Time Limitation of Regression Models by Time-Series Manipulation . . . . .	153

---

<b>6 HIERARCHICAL FORECASTS USING OPTIMIZATION</b>	<b>159</b>
6.1 The Optimized Reconciliation Model (OR)	159
6.2 Using the Optimized Reconciliation Model (OR) for high-dimensional Data	162
6.3 Implementation in python and Gurobi®	164
6.4 Possible Extension: Integrating Correlations given by local Factors of Markov Models	169
<b>7 EVALUATION AND CONCLUSION</b>	<b>171</b>
7.1 Applying the Model to real Industry Data at AUDI AG	171
7.1.1 Definition of the Evaluation Scope	171
7.1.2 Survey with Experts to identify the 10 most relevant PR-families	173
7.1.3 Short-term Forecasting using Regression with online Predictors for the 10 PR-families	173
7.1.4 Mid-term Forecasting and Time-Series Manipulation based on Regression Results	178
7.1.5 Optimized Reconciliation (OR) of the complete Hierarchy	178
7.2 Conclusion	182
7.3 Further Research Opportunities	184
